

Inbound Product Requirements

- 1) Carton size no larger than 24"L x 20"W x 20"H and must not exceed 50 lbs.
- 2) Any human readable font must be 14 pt or greater.
- 3) UPC/part number must be in human readable and barcode format and present on every carton. Unique (different from single unit) outer pack UPC/part number must be present to qualify for item fulfillment pricing.
- 4) We discourage packaging more than one sku per carton. However, we understand it's unavoidable at times. Partial balances of each sku where the individual quantities do not constitute a separate carton may be combined into one carton. Such cartons must conform to requirements set forth in # 3 above (enumerate each part number).
- 5) All inbound shipments to Logistech must reference an ASN # (assigned by LOMACS™), or, a reference # of your choice provided that it is included in the "Reference" field of the ASN when created in LOMACS™. The reference must be in human readable and barcode format.
- 6) Palletized shipments must be stretch wrapped and/or strapped to maintain product integrity during transit. Pallets used must be industry standard 48"x 40" grade #2 or better. Pallet finished dimensions can be no larger than 48"L x 42"W x 48"H and have a maximum weight of 1,650 lbs.
- 7) Acceptable forms of void fill include foam, air pillows and kraft paper. Packing peanuts of any kind, crinkle wrap, and shredded paper are not acceptable. Boxes must be packaged so that the contents can withstand the rigors of transportation and processing.
- 8) All LTL and FTL shipments must have delivery appointments scheduled. Delivery of inbound freight can be scheduled by emailing cs@logistech.us. Email must reference Logistech ASN, # of Pallets and expected delivery date. Customer Service will respond within 1 business day with an appointment.

Any non-confirming shipments delivered to our facility will result in processing delays and additional fees.
